## RealTime and FlexTime LEARNING

**RealTime or Synchronous Learning:** refers to all types of learning in which learner(s) and instructor(s) are in the same place, at the same time, in order for learning to take place. This includes in-person classes, live online meetings when the whole class or smaller groups get together.

**FlexTime or Asynchronous Learning:** occurs through online channels without real-time interaction. This means that learning can occur in different times and spaces particular to each learner. With FlexTime learning, teachers usually set up learning activities which students complete on their own and at their own pace.

Please do not hesitate to reach out to your classroom teacher if you have any questions.
